

# Rapid Property Security Alarm

Protect property from theft, vandalism, squatters and the resulting risk of fire with our professional portable alarm system.

*'A great alarm package that is really easy to use'*

**Simple to deploy** A portable alarm system that is delivered fully configured. Simply locate the alarm sensors, turn the Alarm Controller on and the system is fully operational. No alarm experience is necessary.

**Wireless operation** Alarm sensors are placed in the most effective locations with no wiring required. Each system can be easily moved from site to site when required.

**Detailed reports** When an alarm is triggered the Location, Time, Device triggered and Unique ID are instantly sent to your mobile phone and / or FM's 24/7 Monitoring centre.

**Alarm response** Your own staff can be notified by text message or our 24 Hr Monitoring Centre will call out a local SIA approved security guard.

**Customer helpline** Full support provided by our experienced alarm engineers.

**System hire** Monthly system hire means minimum investment together with a professional response and support service to meet your security needs.

**About FM** After 20 years of portable alarm development for the UK Police Forces FM now offer a commercial alarm system you can install in minutes.
